

Hair Tissue Mineral Analysis

Patient SOLGAR Patient Low Toxic Load
 DOB 31-Dec-1918
 Address 322-324 Cannig Highway Bicton WA
 6157 AUSTRALIA
 Practitioner SOLGAR TEST
 Collection Date 21-Sep-2017
 Report Date 21-Sep-2017

Toxic Elements

Toxic Elements

Element	Result	Reference
Aluminium	6	0 - 12
Antimony	0.004	0 - 0.2
Arsenic	0.005	0 - 0.2
Cadmium	0.014	0 - 0.12
Lead	0.692	0 - 3.3
Mercury	1.01	0 - 1.0
Uranium	0	0 - 0.2

Minerals

Minerals

Mineral	Result	Reference
Boron	0.01	0.3 - 3.5
Calcium	344	300 - 1800
Chromium	0.07	0.04 - 0.3
Cobalt	0.007	0.002 - 0.3
Copper	4.6	10 - 27
Iodine	0.11	0.3 - 3.5
Iron	5.1	6 - 14
Magnesium	22.1	20 - 100
Manganese	0.1	0.07 - 0.4
Molybdenum	0.01	0.02 - 0.3
Phosphorus	112	115 - 180
Potassium	22.9	10 - 200
Selenium	0.61	0.6 - 1.6
Silicon	31.9	70 - 550
Sodium	806.5	20 - 500
Zinc	78	145 - 220

Results are expressed in parts per million (ppm)

Comments

The hair tissue mineral analysis has revealed excess in the following toxic elements:

- Mercury

With appropriate treatment, it is highly likely that the following toxic elements may appear in following hair tissue mineral analyses:

- Aluminium

Results suggest possible malabsorption and that one should consider Healthcare Practitioner advice to exclude causes such as Helicobacter pylori, Coeliac Disease, medications that reduce stomach acid, SIBO and parasites such as Blastocystis, Giardia and Dientamoeba.

Consider doing blood tests to exclude iron deficiency, as your tissue levels of iron are low. This may be due to poor dietary iron intake, blood loss or malabsorption possibly from Helicobacter pylori, Coeliac Disease, medications that reduce stomach acid, SIBO and parasites such as Blastocystis, Giardia and Dientamoeba. Supplementation should be on the advice of your Healthcare Practitioner.

Products

Once the cause of your malabsorption has been treated or at least excluded, the following products are recommended:

SOLGAR Ester C Plus 1000mg - 1 daily

SOLGAR GLUTATHIONE VEGETABLE CAPSULES 250mg - 1 capsule daily (optional but will provide additional support)

SOLGAR Chelated Copper (amino acid chelate) 2.5mg)- 1 daily

SOLGAR Atlantic Kelp (Iodine) 200mcg - 2 daily (not recommended with autoimmune thyroid conditions such as Hashimoto's Disease)

SOLGAR Zinc Picolinate 22 mg Tablets - 1 daily

SOLGAR Selenium 100 ug Tablets (Yeast-Free Selenium) - 1 daily

SOLGAR Oceanic Silica 25mg - 2 daily

SOLGAR CHELATED MOLYBDENUM (amino acid chelate) 150mcg - 2 daily

SOLGAR Multi-Chelated Boron Vegetable Capsules 3mg - 1 daily

It is advisable to reduce/remove exposure to any of the listed heavy metals (refer to Mediscan website for likely sources).

Disclaimer

Graphs, ratios and comparisons with reference ranges are provided for convenience only and should not be considered an interpretation of results or a diagnosis.

Diagnosis and Treatment should be based on the patient's full medical history.

Nutrients are recommended for an adult and not for children, pregnant or breastfeeding women.

If any side effects develop, stop the supplement(s) and consult your Healthcare Practitioner.

Please consult Healthcare Practitioner before starting a new medication or nutritional supplement.

We recommend a follow up test after 6-8 months.

Often there is an increase in the levels of toxic elements on the initial follow up hair analyses as the body now has the nutrients to remove them out of the tissues.

It will decrease once there is very little left in the tissues of the body.

Depending on the level of exposure, it can take anywhere from 6 months to a few years to remove the toxic elements to significantly lower levels.
